

Underhill Precision Cyclone Nozzle with Brass High Flow Control Valve and 3/4in MHT x 1in FHT Adapter

RGHN5000CV

Details

The Cyclone has the highest flowrate of all the Precision nozzles (50+gpm). The purpose of this nozzle is to cool greens on a hot afternoon. The spray pattern is designed to be incredibly broad so that the operator can cool the green very quickly. Use the Cloudburst (blue) in the mornings for spot watering, and the Cyclone (red) in the afternoon for cooling and syringing. Includes a brass High Flow Control Valve and 3/4in MHT x 1in FHT Adapter. 50 GPM Red
