

# King It Irrigation Tester

RKG42024

## Details

This tester is perfect for troubleshooting most irrigation control systems. The King IT uses three modes to diagnose common system conditions: Chatter mode for locating lost valves, testing and activating solenoids, and a tone delivery mode to identify wires.

- Troubleshoot most irrigation control system.
- Battery powered solenoid valve driver
- Compatible with all 24 volt AC solenoids
- Generates powerful tracing tones for identifying wires
- Chatter mode steadily cycles valves to make them easier to find
- Tests solenoids for continuity
- Insulation piercing clips; no stripping required
- Requires two (2) 9V batteries (not included)
