

Fimco Steel Lawn Roller - 24in x 36in

RFLRS2436

Details

Lawn rollers level turf to combat the effects of freezing, burrowing animals, wheel track ruts, and can be used for packing seeding and soil for newly laid sod. The durable polyethylene roller drum resists rust and dents. The steel roller drum and end cap are manufactured with heavy, 14-gauge steel. Fill with water or sand. Rollers are lightweight when empty for easy transport and storage. Rounded end caps prevent gouging or marking. Includes 1" hitch tubes and tow hitch.

Specifications

Manufacturer	Fimco
Manufacturer's Model No	LRS-2436
