

Details

These miniature "speed bumps" are an economical way of controlling carts from cutting corners and wearing bald spots in the turf. Install on hard surfaces at the edge of the cart paths, use in rows for speed control for carts or cars or as a direction indicator on hard surfaces. Easily installed with screws, butyl pads or epoxy (not included). Impact resistant, UV stabilized. 3" W x 6" L x 1 1/8" H. Black.

- Low profile speed control and direction indicator for golf carts
- Install easily
- Impact resistant
- UV stabilized
